Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 and 58-150 of copending Application No. 10/028,852 as characterized by US 2003/0007898.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are directed to a microfluidic device having a virtual wall.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-22 and 24-41 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Barbera-Guillem.

See the appropriate paragraph of the 11/18/04 Office action.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-22 and 24-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubrow et al. alone or further in view of Barbera-Guillem.

See the appropriate paragraph of the 11/18/04 Office action.

Response to Arguments

Applicant's arguments filed 5/18/05 have been fully considered but they are not persuasive.

Applicants' amendments overcome the 35 USC 112 second paragraph rejections.

Applicants' traverse the 35 USC 102 and 103 rejections on the grounds the art fails to teach the claimed "virtual wall". Applicants' state the Office has read the "virtual wall" on the interconnecting channels taught by Barbera-Guillem. Applicants' state the "virtual wall" is a particular type of meniscus formed in an opening of a side wall the is sized and dimensioned ... etc. These remarks are not commensurate in scope with the instant claims as none of these limitations have been put forth.

Applicants' also state Barbera-Guillem teaches microchambers and not microchannels with specific cross sectional diameters. Again these remarks are not commensurate in scope with the pending claims. The Office maintains Barbera-Guillem has been properly read on the instant claims.

Finally, Applicants' Barbera-Guillem does not teach a direct interface between a chamber and the exterior. The instant claims do not reflect this limitation and Barbera-Guillem has been properly applied here.

Applicants traverse the 35 USC rejection over Dubrow et al. stating this reference teaches away from minimizing the dead volume.

The court decided In re Boe (148 USPQ 507) that use of taught "non-preferred" embodiment or an embodiment that is "unsatisfactory for the intended purpose" is still a positive teach and is valid prior art. The Office application of Dubrow et al. is proper.

Conclusion

This is a RCE of applicant's earlier Application No. 10/027,516. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
